Author Guidelines

An **International Journal of Multidisciplinary Research and Evaluation**, is a peer reviewed journal published by Achham Multiple Campus. The aim of the journal is to publish the quality research work of the multidisciplinary field. Double blinded review of the research work is our main process and the journal will publish two issues in each year.

For the journal each author must send two files of their manuscript: (a) The complete version including the author names, designation, affiliations, and email addresses along with the paper; (b) a blinded manuscript without any author information in the text or on the title page. Self-identifying citations and references in the text should either be avoided or left blank.

When received a manuscript, the editor assigns two reviewers in the same or relevant area and requests them to review the manuscript by using the reviewer guideline of the journal. After the feedback/comments of the reviewers, the editor makes a decision based on the reviews and informs the author(s) about the outcome. Based on the comments/feedback of the reviewer and editors the article may reject or accept with major revision or accept with minor revision or accept in existing condition. If revisions are required, the manuscript will send to author to address the comment and request to re-submit with comment address file. If the comments were not addressed properly the article may again reject. After acceptance of the article, author must arrange their manuscript on journal templet and resubmit final version.

Manuscript Submission Process

Author must submit their manuscripts to the editing coordinator of the journal atachhamcampus2048@gmail.com. in Microsoft word format based on Authors' Guidelines. The Times New Roman font style is mandatory for articles in English language and Preeti is mandatory for the articles in Nepali language.

Permissions

Authors who wish to include tables, figures, or text passages that have already been published elsewhere are required to obtain permission from the copyright owner(s) and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors and the publisher of the journal will not be responsible for the consequences.
